

Metalot Foundation

Mission statement

The Metalot Foundation acts as innovation powerhouse on the **circular use of metals and energy**, aimed at the **development of technology prototypes** for sustainable energy use and industrial process technology, with specific focus on large-scale use of **metals as energy carrier** and on **circular metal processes**.

Distinctive strength through teamwork:

- **substantive expertise and drive:** Metal Power, with links to Hydrogen Systems and Battery Systems
- providing **facilities to develop (pre-industrial) prototypes**, from idea to market.
- taking a **stimulating and organizing role** to create opportunities and make choices in a focused community

Metalot as an organization

- **Non-profit organization:** income from founding fathers, subsidy projects, exploitation of facilities, memberships.
- **Pivotal role** in bridging educational and knowledge institutions (including student teams), companies and industry, and governments.
- **Located on an innovation campus** working on circular use of metals and energy

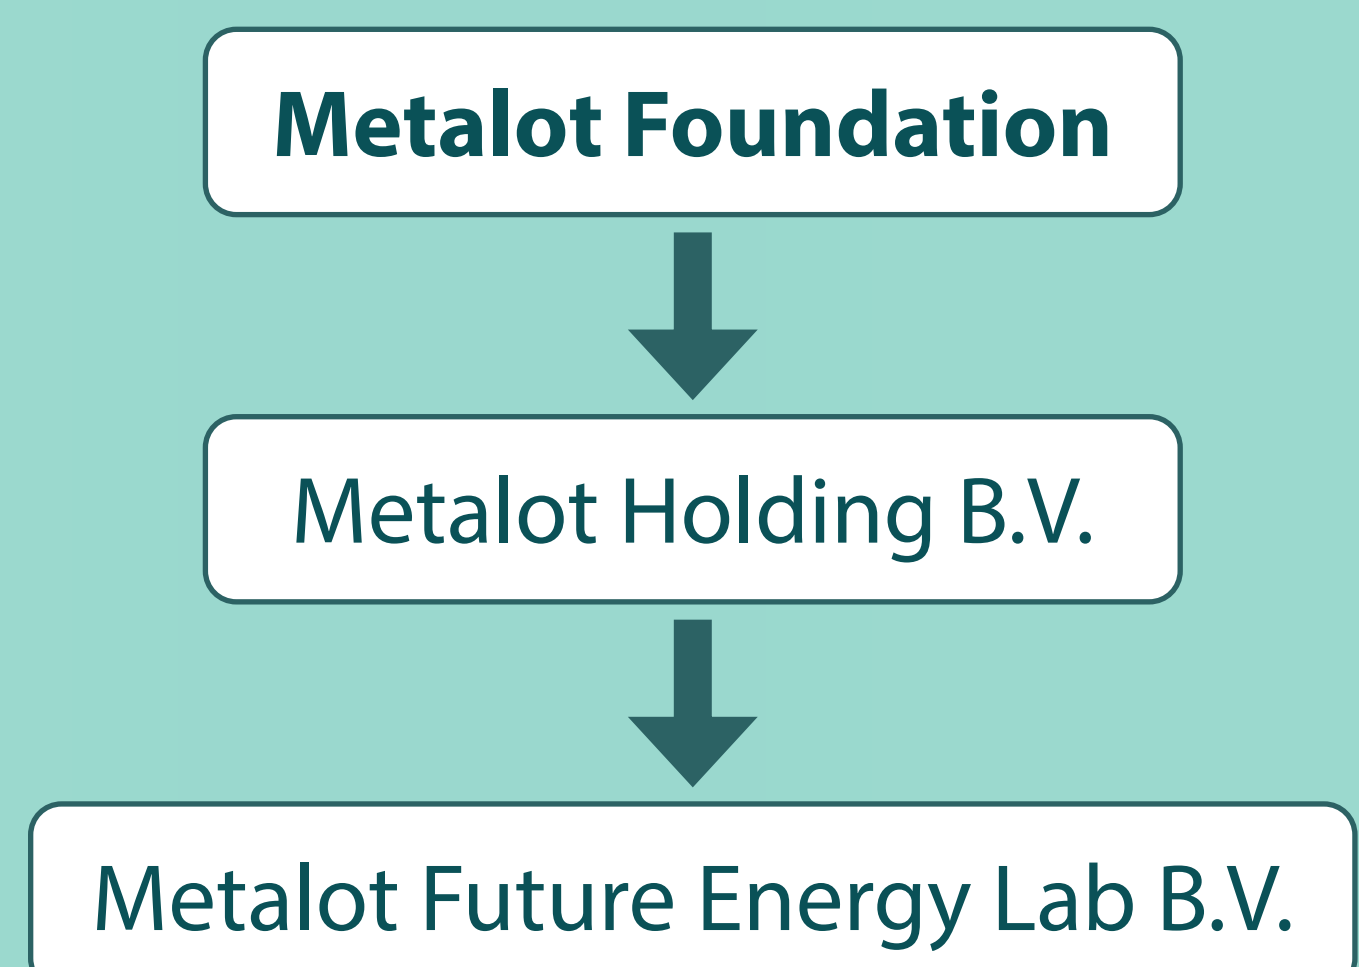

Foundation Board

- Philip de Goey - chairman
- Jan Vlassak
- Frans Kuppens
- Guido Janssen
- Han v. Kasteren

Advisors

- Coen de Graaf
- Rob van Midden
- Wim Konz
- Hans van der Donk

Structure

The Metalot Foundation is supported by the Eindhoven University of Technology, Nyrstar, the Municipality Cranendonck, and the Province Noord-Brabant
